HealthFore – Transforming Healthcare

HealthFore Technologies Limited is a global healthcare IT solutions and advisory services company. Our B2B and B2C IT solutions help hospital chains, diagnostic centers and public health enterprises realize superior clinical outcomes.

Our patient-centric healthcare solutions focus on wellness, preventive care and condition management. Our information and health advisory services ensure prompt diagnosis and treatment of diseases. We create mass awareness to improve the quality of life through self-care.

HealthFore's IT products and services are built on leading-edge technology. Our solutions increase productivity and boost revenue for healthcare providers through process automation, interoperability and collaboration. Significantly, our customized solutions enable world-class patient care and comply with healthcare regulations, while minimizing costs.

We increase the reach of healthcare by investing in R&D. Our team of doctors, radiologists, dentists, physiotherapists, nurses, hospital administrators, pharmacists, and technicians provide insights to develop innovative solutions and streamline healthcare. Our strategic relationships with Microsoft, Oracle, IBM, HP, and Barco are the backbone of our healthcare solutions

About Our Customer

Mediclinic Middle East is part of Mediclinic International, one of the top 10 listed private hospital groups in the world with 52 healthcare facilities in Southern Africa, 14 in Switzerland under the name Hirslanden AG and 10 facilities in the UAE. Their headquarters are in Stellenbosch, South Africa.

Mediclinic Middle East owns and operates some of the most respected healthcare facilities in the region. These include Mediclinic Welcare Hospital, Mediclinic City Hospital, Mediclinic Dubai Mall, Mediclinic Ibn Battuta, Mediclinic Meadows, Mediclinic Arabian Ranches, Mediclinic Mirdif, Mediclinic Al Qusais, Mediclinic Al Sufouh and Mediclinic Beach Road.

Mediclinic ME has deployed HealthFore's HIS across their entire network of hospitals and clinics in Dubai. The implemented system provides access to key patient information across the network ensuring enhanced decision making and increased patient safety. Currently, City Hospital and 8 Medical centres are fully operational under a single central EMR and centralized HIS deployment.

In early December 2012, Mediclinic ME Welcare hospital also went "LIVE" with Magnum HIS and is now connected to their central network across 10 sites. Now, all their physicians have access to centrally available patient information and data, enabling better coordination and continuity in the care they deliver. Moreover HealthFore has been dedicated and highly supportive in enabling EHL comply with the regional, ministry and insurance related requirements along with quick responses to their functional enhancement requirements.

Also, HealthFore's technology consulting division worked with business leaders to solve their challenges by developing practical business solutions based on our deep insights and experience. A full spectrum of consulting across Infrastructure, networking, servers, storage and database was provided.

Mediclinic Welcare is one of their busiest hospitals in Dubai; having more than 600 OPD's, 225 A&E's and 100 Inpatients flowing through Magnum every single day.
